SERIES 1

One series. Four ways to build your club.

60 player profiles / 90 collectible designs

Alpha and Bravo: 3-card openings. Elite and Beta Event: 5-card openings. Every product has exactly 50 eligible card definitions.

Design specification 1.0. Includes individual card attributes, art direction, exact pools and opening probabilities. Runtime installation and combat balance are separate implementation work.

One face. Three finishes.

Original, Elite Showcase and Beta Event share the same player profile. The artwork changes; the stats do not.

Portrait first, large handle, clear role and tier, separate rarity rail, three readable headline indices. Eight exact attributes and the complete game policy remain available in inspection.

Generated reference illustrations establish composition and materials. Final spellings, numbers and tiers come from the manifest as separate text layers. The following catalogue uses precise layout proofs with portrait positions, not ninety completed portrait assets.

The four launch products

CSTCG Series 1 Alpha

3 player cards / 50-card pool / 1 RARE OR BETTER

240 earned Credits (balance candidate)

FIRST CONTACT / split A / forward slash / Peak in at least one slot: 0.1999%

CSTCG Series 1 Bravo

3 player cards / 50-card pool / 1 RARE OR BETTER

240 earned Credits (balance candidate)

THE NEXT MOVE / double chevron / folded B / Peak in at least one slot: 0.1999%

CSTCG Series 1 Elite

5 player cards / 50-card pool / 1 LEGENDARY+ SHOWCASE

1,000 earned Credits (balance candidate)

THE HEADLINERS / faceted five-point crest / Peak in at least one slot: 0.4990%

CSTCG Series 1 Beta Event

5 player cards / 50-card pool / 1 RARE+ EVENT EDITION

Earned from the First Circuit event track

FIRST CIRCUIT / split beta glyph / event ribbon / Peak in at least one slot: 0.2997%

Rarity, tier and useful roles

Rarity	Frame	Material
Common	Single steel rail	Matte
Uncommon	Double sage notch	Satin
Semi-Rare	Three cyan segments	Brushed foil
Rare	Blue aperture + four ticks	Blue foil
Legendary	Gold cap + five ticks	Embossed metal
Peak	Pearl arch + six ticks	Interference foil

All Series 1 designs begin at T5. Floor and Divine are excluded from these products. The prototype's Epic label is legacy-only. Rarity is a discovery label, tier is development, and finish is an artwork treatment.

Eight natural attributes

Aim / Reaction / Positioning / Utility / Gamesense / Clutch / Teamwork / Consistency

OVR = rounded eight-attribute mean. AIM = Aim. IQ = rounded mean of Positioning, Gamesense, Clutch and Consistency. UTIL = rounded mean of Utility and Teamwork. OVR is not a match-win predictor.

A useful low-rarity card: Common RUSH has AIM 72 / IQ 77 / UTIL 87. Peak NiKo also has UTIL 87, with AIM 97. Rare Aleksib has UTIL 96. Cards perform different jobs instead of following one universal power ladder.

Exact pools and opening rules

Pool	C	U	SR	R	L	P	Cards
Alpha	15	5	10	10	5	5	3
Bravo	15	5	10	10	5	5	3
Elite	0	10	10	10	10	10	5
Beta Event	5	5	10	10	10	10	5

Each pool has ten designs per role. Alpha and Bravo share forty definitions; together they contain all sixty originals. Elite has forty originals and ten Showcases. Beta Event has thirty originals and twenty Event editions.

Slot table	C	U	SR	R	L	P
Alpha/Bravo 1–2; Event 1–4	45	30	18	6.5	.45	.05
Alpha/Bravo 3; Event 5	0	0	0	95	4.9	.1
Elite 1–4	0	25	40	30	4.9	.1
Elite 5	0	0	0	0	99.9	.1

All entries are percentages. Final Elite slot filters to Showcase only; final Event slot filters to Beta Event editions. Rarity is selected first, then one eligible definition uniformly. Repeats are possible. Per-card probabilities are supplied for all 200 memberships.

Whole-opening Peak chance: Alpha/Bravo 0.1999%; Elite 0.4990%; Beta Event 0.2997%. Direct choice rewards and the guaranteed welcome Peak are separate from these ordinary odds. Prices, reward cadence and release values remain balance candidates.

Art and implementation handoff

Portrait and frame

840 × 1,200 px face artboard, 40 px safe margin. Portrait/background, cutout mask, rarity frame and foil mask are separate layers. Keep skin neutral and text clear. Preserve source assets.

Live information

Names, handles, country, role, tier, stats, rarity, collector number, provenance and ownership labels come from structured data. No baked price, invented match fact, fake autograph or unique serial.

Concealment and inspection

Opening sleeves have one uniform CSTCG Series 1 back. Revealed cards have an inspection reverse with eight values and the full policy. Hidden opening covers do not reveal identity or rarity.

Collection identity

60 player IDs, 60 immutable profile templates and 90 collectible card IDs. Alternate finishes share their template. Only one version of a professional fits a lineup. Future owned instance IDs remain separate.

Implementation scope

The current runtime remains alpha 0.2. A future installation adds six rarity tiers, three/five-card openings, finish-aware guarantees, eight-attribute inspection, policy behavior and an explicit legacy-save migration.

Validation

The design builder checks all pool sizes and role counts, 10,000-basis-point slot sums, every weighted eligibility cell, every advertised design's reachability, finish stat parity, overlaps and expected direct release returns.
